

Inoculation Spreader, L-Shaped

EO Sterile, Inner Resealable Bags

Inoculation Spreader, L-Shaped

Our Inoculation Spreaders are designed for the precise and uniform spreading of bacterial cultures.

Their unique L-shape allows for easy application across the entire surface of a Petri dish or plate. Manufactured from durable High-Impact ABS, these spreaders eliminate the need for time-consuming flaming or autoclaving.

The smooth spreading surface, featuring a slight upward return, minimises the risk of damaging the delicate agar sample. This ensures reliable and consistent results in your microbiology applications.

Product Features

- Inoculation Spreaders, ABS, EO Sterile
- L-Shaped for Even Spreading of Bacterial Cultures
- 25 Per Resealable Inner Bag, Packs of 500
- Lot Traceability, Disposable

Product Specifications

Type	Inoculation Spreader, L-Shaped
Material	Acrylonitrile Butadiene Styrene (ABS)
Colour	Dark Blue
