Codes 665-730 to 665-761

## Introducing SpaceMaster 2.0

Discover the new mobile shelving storage system that adapts with your ever-changing needs.

### Increase Storage Capacity & Efficiency with Three-Dimensional Compression.

The SpaceMaster 2.0 is the next generation of mobile shelving solution offering limitless configurations to meet the specific needs, spaces, and applications of users.

Developed by Westlab, the SpaceMaster focuses on three-dimensional (3D) compression to maximise storage capacity while maintaining unmatched flexibility. By leveraging the popular Gratnells system, users can interchange tray sizes and colours as needed to optimise storage capacity. The heavy-duty track system requires no floor-fixing, making it ideal for any space and surface. Each storage bay slides forwards and backwards using a hand-wheel for an effortless motion. With 32 storage unit options to choose from, the SpaceMaster is perfect for a wide range of industries, available spaces and applications.

The SpaceMaster comes with a 5-year warranty on Gratnells components and 10-year on the track components.

### Key Features

- Efficient storage capacity thanks to 3D compression
- Interchangeable trays sizes and colours
- Heavy-duty 25mm steel frame
- No floor-fixing track system
- 32 storage unit options to choose from
- Made in Australia and the UK

Westlab have been supporting the education, scientific and medical community since 1993 and are reliable suppliers and innovators, delivering cutting edge, future-proof solutions to enable your next discovery.

With offices in Australia, North America and New Zealand, Westlab ensure a consistent supply of the latest products and equipment, from test tubes to intelligent full-lab fit-outs/lab spaces – when our clients need them.

## About Gratnells Storage System

For more than a generation Gratnells has been offering modular design storage tailored for high-traffic spaces. Manufactured in England, Gratnells is renowned for its quality, durable and highly adaptable storage solutions.

The iconic Gratnells trays are a staple in learning environments worldwide. By using fully recyclable Polypropylene (PP), these trays are standardised for seamless integration with typical school furniture, beloved by teachers and technicians, and BSI approved for heavy educational use.

The Gratnells frames offer a practical solution for optimising space and designed to complement existing storage units. Manufactured from durable, powder-coated steel, the frames also feature back diagonal bars for enhanced stability.

Gratnells products come with a 5-year warranty providing customers with confidence in their investment.

### Key Features

- Powder coated frame for easy cleaning
- Adjustable feet & back diagonal bars for stability
- Anti-fade colour protector, scratch resistant
- Anti-static additive for dust protection
- Over tray colours available in 4 sizes
- Manufactured in the United Kingdom

## About the Track System

The unique low-profile track and runner system can be installed directly onto most floor surfaces. The system consists of aluminium extrusion tracks and a series of heavy-duty aluminium runners and wheels to ensure smooth and seamless mobility.

Unlike other solutions, the track system does not require a prefabricated base. A lightweight runner frame supports the Gratnells sets and provides structure rigidity for any configuration available.

Because there is no construction involved on site, installation can be carried out quickly, quietly and with a minimum of disruption.

Each storage bay slides forwards and backwards using a hand-wheel for an effortless motion

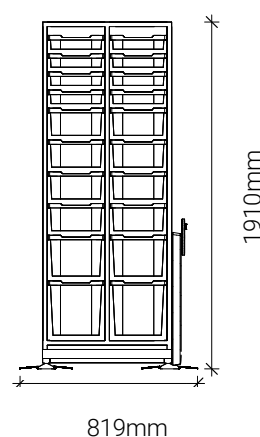

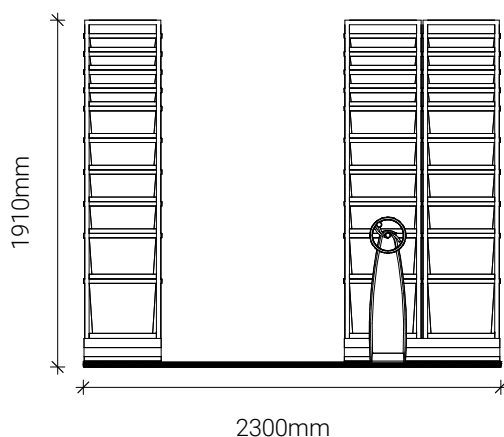

The track system is manufactured in Australia, and it comes with a 10-year warranty.

### Key Features

- Ideal for most storage applications
- Lightweight modular track system
- No Floor-fixing required
- Side-wheel ensures effortless operation
- Manufactured in Australia
- 10-year warranty
