## Workplace Eyewash First Aid Kit

### Eye trauma is the leading cause of blindness worldwide.

It is estimated that 116,000 Australians present to hospitals, emergency departments and general practitioners every year with ocular injuries. Initial treatment of many work-related eye injuries can prevent serious and long-term eye damage.

Eyewash stations and specific eyewash first aid kits should be easily accessible so that eyes which have been invaded by foreign substances can be promptly irrigated and the likelihood of permanent eye damage reduced.

This kit is also a perfect way to keep your workplace compliant if an additional risk of eye injury has been identified in a risk assessment.

Built to resist dust and water, the securely sealed plastic case is designed with a rubber seal to prevent dust contamination and can be wall mounted.

### Product Features

- Plastic Container
- Waterproof, Dustproof
- 19 Components
- Wall Mountable
- Compact

### Product Specifications

Number of Components	19
Dimensions	130 x 210 x 75mm

### Kit Components

## Workplace Burns First Aid Kit

New data from one of Sydney's biggest hospitals showed hospital admissions for burn injuries up by nearly 50 per cent.

A survey uncovered 88% of Australians know to treat a burn immediately, while only 20% do so correctly.

Be ready and prepared to administer first aid fast with Westlab's Workplace Burns First Aid Kit.

Built to resist dust and water, the securely sealed plastic case is designed with a rubber seal to prevent dust contamination and can be wall mounted.

### Product Features

- Plastic Container
- Waterproof, Dustproof
- 16 Components
- Wall Mountable
- Compact

## Frequently Asked Questions

### FIRST AID IN RELATION TO THE WORK HEALTH & SAFETY ACT (WHS)

#### WHO IS RESPONSIBLE?

A person conducting a business or undertaking [PCBU] has the primary duty under the WHS Act to ensure, so far as is reasonably practicable, that workers and other persons are not exposed to health and safety risks arising from the business or undertaking.

#### WHAT IS 'WHS'?

The 'Work Health & Safety Act' [WHS] is the agreed harmonisation of each state and territories OHS legislation to develop a new national code of practice by Safe Work Australia.

#### WHO REGULATES & ENFORCES THE NEW 'WHS' LAWS?

SafeWork Australia does not regulate compliance and enforcement of the 'WHS' code of practice. The enforcement is conducted by each state or territory's body such as WorkCover, WorkSafe or SafeWork etc.

#### WHAT DOES 'WHS' MEAN FOR ME?

The WHS change means that you are or will soon be required to replace or update your current first aid kits.

#### WHO SHOULD PERFORM FIRST AID KIT CHECKS?

Usually a first aider.

#### HOW OFTEN SHOULD I CHECK?

After each use. If the kit is not used and the tamper seal is in place, then refer to the expiry date on the back of the kit.

#### WHAT DO I CHECK FOR?

Ensure that the items are in good working order, have not deteriorated and are within their expiry dates. Ensure that the sterile products are sealed and have not been tampered with. An inventory list in the kit should be signed and dated after each check.

#### WHAT FIRST AID SIGNAGE IS REQUIRED?

Displaying well-recognised, standardised first aid signs will assist in easily locating first aid equipment and facilities. Further information on the design and use of signs is available in Australian Standards AS1319 – Safety Signs for the Occupational Environment.

#### IS MY SITE LOW RISK OR HIGH RISK?

A Low-Risk Workplace is when employees are not exposed to hazards that can result in serious injury or illness such as offices, shops, or libraries. The potential work-related injuries and illnesses requiring first aid would be minor in nature.

A High-Risk Workplace is when employees are exposed to hazards that can result in serious injury or illness such as mobile plants, manufacturing plants, construction, mining, trades, warehousing, laboratories, and food manufacturing.

#### WHEN DOES MY SITE REQUIRE A FIRST AID ROOM?

A first aid room should be established at a workplace if a risk assessment indicated that it would be difficult to administer appropriate first aid unless a first aid room is provided.

#### IS MY WORK VEHICLE CLASSIFIED AS A WORKPLACE?

Yes, work vehicles are considered as a workplace. "A portable first aid kit should be provided in the vehicles of mobile workers if that is their workplace (for example, couriers, taxi drivers, sales representatives, bus drivers and inspectors)" Source: 2015 First Aid in the Workplace Code of Practice, SafeWork Australia, Section 3.1
